

Technology and Solutions Summit 2018

Visit the HPE New Technology Room!

For this TSS run, the HPE New Technology Room will offer you the capability to touch and see HPE Products and Solutions, talk to the experts about Compute, Storage, Networking, Converged and HyperConverged products and look at the latest Software-defined solutions.

Opening timing

Monday, 19 March	10:30 - 12:30
Tuesday, 20 March	12:30 - 18:30
Wednesday, 21 March	12:30 - 18:30
Thursday, 22 March	10:00 - 16:30
Friday, 23 March	Closed

And when you visit at least 12 of 19 stations you will be entered into the draw for 1 of the 4 Amazon Fire HD 8 tablets!

Composable Infrastructure: HPE Synergy

Come and talk with the HPE Composable Infrastructure expert.

HPE Apollo Servers for HPC

Come and see the latest on Apollo Servers from HPE Apollo GPU optimized servers to the HPE SGI 8600 liquid cooled servers.

New technologies on HPE ProLiant Gen10 servers

Come and see the latest on ProLiant Gen10.

Next Generation Rack & Power Infrastructure

Transition to the Next Generation of HPE Rack & Power Infrastructure.

An in-depth look at the new HPE Rack and Power Infrastructure products launched in the past year as well as plans for 2018. We will cover new or planned G2 product enhancements, product positioning within the portfolio (what to sell, who to sell to, and when to sell it), and competitive comparisons. Additionally, we will discuss how to manage these products and how they fit into the future HPE OneView.

Aruba 360 Secure Fabric

Meet the experts and get a demonstration of the latest member of Aruba 360 Secure Fabric solution: Aruba IntroSpect and Aruba ClearPass 6.7.

Aruba Cloud and SD- Branch Solutions

The price of connecting with your staff and customers in the branch office is usually complex and costly. SD-WAN can help, but only solves a small part of the problem.

Visit us for a live demo to see how Aruba Central, ClearPass, Gateways, IAP and ArubaOS-switches come together to enable the Software-Defined-Branch and find out what fingerprinting, micro-segmentation, firewalling, deep packet inspection and dynamic path steering has to do with that.

Mobile-First LAN Portfolio

Come to our booth and discover the newly Awarded "Tech Innovators 2017" by CRN: the Aruba 8400 8-slots chassis and 8320 Top of Rack switches! See a Live Demo of the brand new ArubaOS-CX and Network Analytics Engine. Come and learn how COLORLESS PORT and PER USER TUNNEL NODE simplify operations and allow for a single unified Policy Management for Wired and Wireless, TODAY! Discuss Network Programmability with our expert and see Python/Ansible scripts using Aruba API across the LAN portfolio.

Mobile-First WiFi Portfolio

Get the latest details on Aruba new WLAN products and features for the campus:

- New Unified Outdoor APs, Enterprise APs and Small office APs
- ArubaOS 8.3 release refresh

HPE OneView 4.0 NTR Station

Come and see the latest on HPE OneView4.0

HPE Primary Storage New Technologies

Talk to the experts in the NTR room and get the latest news about Nimble, 3PAR and other HPE primary storage platforms.

HPE StoreOnce and RMC Next Gens

Get the first insight of next generation StoreOnce and RMC.

Take a look how the RMC integrations work including the new RMC-Exchange addition.

File & Object Storage

Unstructured data remains the fastest growing use case for shared storage. Through innovative NAS solutions and Object Storage platforms, HPE is well placed to deliver competitive solutions to your customers in this space. Come and discuss the concepts of file and object storage and understand what HPE can deliver in this space to lower the cost of deploying highly resilient, petabyte scale, cloud ready storage.

HPE OneSphere

HPE OneSphere is an as-a-service multi-cloud management platform that simplifies management of multi-cloud environments and on-premises infrastructure. Through a unified view, IT can compose hybrid clouds capable of supporting both traditional and cloud-native applications.

Mission Critical news and innovations

HP-UX 11i v3 delivers strategic new functionality in 2017. The HP-UX March update release, and subsequent web releases, provide significant customer request updates. Hear how new development in availability and manageability will increase the options you have to deploy application on HP-UX and discover about the new HP-UX Openstack integration to control large pools of compute, storage and networking resources throughout a datacenter, managed through a dashboard or via the OpenStack API.

HPE Virtualized NonStop

We have moved to X86 for compute and InfiniBand for I/O. And we are moving even further. With the vNonStop software stack you will run your solutions and SQL/MX databases in the private and hybrid clouds retaining the fundamentals of NonStop: Continuous availability, Massive scalability and Data integrity.

Modular Data Center Technology offering from HPE

Come get a view about HPE Modular Container based Data Center, find out about the updated portfolio and newest models designed to keep up with the modern IT trends!

HPE Converged Edge Systems: Moonshot Systems and IoT

HPE Moonshot Reinvented and IOT systems - accelerating insight at the edge.

StoreFabric M-series, ISCSI storage optimized

With an increasing need to access data faster and accommodate growing workloads, rising levels of east-west traffic, and new storage arrays based on flash storage technologies, a high bandwidth, low-latency network becomes paramount. The HPE StoreFabric M-Series Ethernet switches offer a 100GbE-based network platform capable of delivering unbelievable networking speed and agility to keep pace with the most intense workloads small- to large-scale enterprises can produce.

HPE HyperConverged

Come and talk with the HPE HCI expert. You will hear the latest on HPE SimpliVity.
