Technology and Solutions Summit 2017

Visit the HPE New Technology Room!

For this TSS run, the HPE New Technology Room will offer you the capability to touch and see HPE Products and Solutions talk to the experts about Compute, Storage, Networking, Converged and HyperConverged products, look at the latest Software-defined solutions.

Opening timing

Monday, 6 February	10:30 - 12:30
Tuesday, 7 February	11:15 - 14:00 15:50 - 18:30
Wednesday, 8 February	12:00 - 18:30
Thursday, 9 February	10:00 - 16:30
Friday, 10 February	Closed

And when you visit at least 12 of 23 stations you will be entered into the drawings for 1 of the Beats Dr. Dre Solo 2 Wireless on-ear Headphones!

Moonshot and IoT

HPE Moonshot Reinvented and IOT systems - Accelerating insight at the edge.

Aruba Network Security

Meet the experts and get the latest roadmap information and an update about Aruba Security Solutions with Clearpass IoT and user access policy management and HPE Visualizer SDN Application.

Wired Campus for Mobile-First Networks

Visit our booth and discover the latest improvements in our switching and routing solutions for campus and branch offices: new stacking capabilities, high availability, simpler deployment and troubleshooting, etc.

Mobile-First WiFi Portfolio

Get the latest details on new products and features for Aruba Campus, Instant and Central WiFi solutions.

Mobile Engagement

Get familiar with the latest additions to our Meridian and ALE platforms for Mobile Engagement and Analytics.

Composable Infrastructure: HPE Synergy

Introduction to HPE Synergy, the first of a new category called Composable Infrastructure, the HPE's vision for a new class of infrastructure to service both traditional IT and the New Style of Business.

Data Center network management system

Find out the latest from IMC managing from the Edge to Dc of multi-Vendor Networks, plus Arista CloudVision for Arista DC management and automation.

Data Center TOR/leaf

Get familiar with the next network DC speed with the brand new 5950 fixed 25G TOR and the next gen swiss-knife switch, the 10/25/40/100 4slot 2U modular 5950.

Data Center Core/Spine

Familiarize yourself with the latest HPE DC Core hardware including the 2-slot 12902E chassis and HB line cards (36p 100GbE QSFP28, 48p 40GbE QSFP+ and 48p 10G/2p 100G modules).

Hybrid Cloud Software

Join our booth to learn the latest news on CloudSystem 10 and Helion OpenStack.

Mission Critical news and innovations

HP-UX 11i v3 delivers strategic new functionality in 2017. The HP-UX March update release, and subsequent web releases, provide significant customer request updates. Hear how new development in availability and manageability will increase the options you have to deploy application on HP-UX and discover about the new HP-UX Openstack integration to control large pools of compute, storage and networking resources throughout a datacenter, managed through a dashboard or via the OpenStack API.

New technologies on ProLiant Gen9 servers

Meet the ProLiant Gen9 rackmount 2-socket and 4-socket servers which are a major delivery milestone in HPE's compute strategy. Featured with the latest CPU/memory technologies and a choice of server options such as GPU cards, IO accelerators, NVMe drives and the recent breakthrough Persistent Memory they dramatically boost server's performance.

Virtual NonStop

We have moved to X86 for compute and InfiniBand for I/O. And we are moving even further. With the vNonStop software stack you will run your solutions and SQL/MX databases in the private and hybrid clouds retaining the fundamentals of NonStop: Continuous availability, Massive scalability and Data integrity.

Next Generation Rack and Power Infrastructure

Meet the experts, see our new products and look at how HPE's Rack and Power Infrastructure solutions are evolving for 2017.

HPE Density Optimized Servers for HPC

Learn more on Density Optimized servers Product Lines.

- Apollo 2000 optimized for compute
- Apollo 4000 optimized for storage
- Apollo 6000 optimized for compute

Come and learn also about the new SGI HPC portfolio.

Visit the Performance Optimized DataCenter (aka POD)

HPE Performance Optimized Data Center - Mission to deliver a turnkey data center in up to 14 weeks!

HPE Scalable Object Storage and File Storage

Object Storage is a hot topic in the industry, it is a completely different way of managing large amounts of data economically and is already being used by millions of users worldwide. Come and discuss the concepts of object storage and understand what HPE can deliver in this space to lower the cost of deploying highly resilient, petabyte scale, cloud ready storage.

Introducing the StoreVirtual 3200

Come and meet the StoreVirtual 3200 in person! Don't pass up this opportunity to speak with the experts, as well as disassemble (and reassemble) the most exciting Entry storage solution in existence.

HPE 3PAR StoreServ Flat Backup

Protecting your business-critical applications without impacting performance is proving ever more challenging in the face of unrelenting data growth, stringent recovery service level agreements (SLAs) and increasingly virtualized environments. Array-based snapshots offer fast, non-disruptive point-in-time copies of data. But snapshots alone cannot deliver comprehensive backup. HPE StoreOnce Recovery Manager Central (RMC) software integrates HPE 3PAR StoreServ primary storage with HPE StoreOnce Backup systems to provide a converged availability and flat backup service that augments traditional backup approaches. Come and learn more about new integrations of RMC.

HPE 3PAR StoreServ New Technologies

Talk to the experts in the NTR room and get the latest news about 3PAR and see a live demo of the latest StoreServ Management Console (SSMC simulator).

HPE Converged Systems CS700

Come and learn about the latest on HPE Converged Systems CS700.

Management with HPE OneView

Learn all you need to know about HPE OneView 3.0, its features and unique capabilities. Get an insight into today's capabilities as well as future vision, for composable infrastructure management.

HyperConverged Systems

Power Of HPE Converge Infrastructure Management for Virtual Environment, and get ready for stepping to Composable infrastructure!
